

## ***Safe and Drug Free Schools and Communities Act***

Consistent with the Drug-Free Schools and Communities Act, Westmont has adopted and implemented policies that are intended to prevent the unlawful possession, use, or manufacture of illegal drugs and the abuse of prescription drugs by students and employees. Substance abuse exposes the user to a variety of significant health risks\*, affects the family and the community and under certain circumstances subjects the user to a range of college sanctions, state, federal and local penalties\*\*. College policy prohibits the unlawful use and presence of all controlled substances and any related paraphernalia. Students and employees are also prohibited from exceeding the dosage of physician-prescribed medications or consuming another individual's prescription medication.

Violation of college policy with respect to drug use or possession is a serious breach of our behavioral expectations, and students who violate this policy are subject to the full range of disciplinary consequences, including expulsion from the college. When there is reasonable suspicion of drug use by a student, the college may request that the student submit to a drug test as part of the student conduct process. The student may refuse the test; however, the college may draw negative inferences from that refusal. Random drug testing is a typical sanction for a student who is found responsible for a drug related violation.

If you need help or know someone with a drug-related problem, please know that Health Center and Counseling and Psychological Services (CAPS) provide confidential consultations and also make referrals to outside counseling and treatment services. Faculty and staff may contact Human Resources to access help that is available through Westmont's Employee Assistance Program.
